

It's a Pelican Faceoff!

How does the "Pelican Drop" Pelican compare to our local brown pelicans?

BROWN PELICAN

- Weighs 6-7 pounds
- 4-feet-tall
- 7 foot wingspan
- Takes 30 days in an egg to create
- Can fly as high as 60 feet
- Can fly as fast as 30 mph
- Greyish-brown soft feathers
- Uses own pelican-made energy
- Found along the Gulf Coast

NEW YEAR'S EVE PELICAN

- Weighs HALF A TON
- 13-feet-tall
- 17 foot wingspan
- Took 300 man hours to create
- Will "fly" to the top of 100-foot crane
- Will "fly" as fast as 3.4 mph
- 2,000 hand cut metal feathers
- Uses 3000 watts, enough to run 4 televisions
- Found only on New Year's Eve in Downtown Pensacola
